

SUBASH LAMA

AI Security Engineer | Information Security Analyst | SOC Analyst | IAM Analyst | GRC Analyst
Kathmandu, Nepal - +977 9840005771 - lamasubash107@gmail.com - linkedin.com/in/subash-lama-b319a016b - github.com/Subash107

PROFESSIONAL SUMMARY

Cybersecurity professional with 12+ years in enterprise IT, now focused on AI/LLM security as an AI Security Engineer conducting red-teaming and adversarial testing of production AI systems. Background spans security operations, GRC, and IAM, with a track record of reducing security incidents by 60%, cutting MTTR by 40%, and maintaining 99.9% infrastructure uptime across multi-site environments of 200+ users. Hands-on expertise in SIEM administration (Wazuh), IDS/IPS (Suricata), threat hunting, alert triage, and incident response aligned to NIST 800-61 and MITRE ATT&CK. Applies this enterprise security foundation to AI-specific risk: prompt injection testing, jailbreak analysis, and OWASP LLM Top 10-mapped assessments. Strong IAM foundation across Active Directory, RBAC, MFA, SSO, PAM, and user lifecycle management. Cisco-certified Ethical Hacker and active bug bounty researcher. Open to remote, hybrid, or on-site roles.

CORE COMPETENCIES

AI/LLM Security: LLM Red-Teaming, Adversarial Testing, Prompt Injection and Jailbreak Analysis, AI Red Team Assessments, OWASP LLM Top 10, Model and Agent Pipeline Security

SOC and Threat Operations: SOC Operations, Alert Triage, Threat Hunting, Incident Response, Log Analysis, Detection Engineering, MTTD/MTTR Improvement

SIEM and Security Tools: Wazuh SIEM, Suricata IDS/IPS, Sysmon, mitmproxy, Pi-hole, Wireshark, tcpdump, Nessus, Burp Suite

IAM: Active Directory, RBAC, Group Policy (GPO), MFA, SSO, PAM, User Provisioning and Lifecycle Management, Zero Trust, Least Privilege

GRC and Compliance: Risk Assessment, Vulnerability Management, Security Policy, Audits, NIST CSF / 800-53 / 800-61, ISO 27001, CIS Controls

Networking and Infrastructure: Firewalls, VPN, DNS, DHCP, VLAN, Proxy Servers, Cisco Routing and Switching, Network Traffic Analysis

Systems and Cloud: Windows Server, Linux (Ubuntu, Red Hat, Debian), VMware vSphere/ESXi, Hyper-V, AWS, Office 365, MySQL, Docker

Automation and DevOps: Python, Bash, PowerShell, GitHub Actions (CI/CD), Ansible, Infrastructure as Code, Prometheus, Grafana, DevSecOps

PROFESSIONAL EXPERIENCE

AI Security Engineer

Waft (WaftTech) - Remote | August 2026 - Present

- Conduct AI/LLM red-teaming and adversarial testing against production AI systems, identifying prompt injection, jailbreak, and model-manipulation vulnerabilities.
- Perform structured AI red team assessments mapped to the OWASP LLM Top 10, documenting exploit paths, root cause, and business impact.
- Collaborate with engineering teams to harden AI agent pipelines against adversarial inputs and unsafe tool-use behavior.
- Apply a 12+ year enterprise security background (SOC, IAM, GRC) to AI-specific risk assessment and reporting.

Independent Cybersecurity Researcher

Self-directed Security Research Lab - Remote | 2023 - Present

- Built and grown a personal SOC detection lab since 2023 (Wazuh SIEM, Suricata IDS/IPS, Sysmon, Pi-hole, mitmproxy) alongside full-time roles, expanding it into a production-grade environment during a dedicated full-time research period in 2026 - alert triage, threat hunting, and incident response.
- Engineered 20+ custom SIEM correlation rules mapped to MITRE ATT&CK, reducing false positives and improving MTTD.
- Authored incident response runbooks and investigation SOPs aligned to NIST 800-61, published as open documentation.
- Automated infrastructure hardening, deployment, and health monitoring with Python, Bash, and IaC practices.
- Active bug bounty researcher on HackerOne, Intigriti, and Bugcrowd - responsible disclosure of 15+ vulnerability patterns.

IT Officer / System and Network Administrator

Primuson Pvt. Ltd. - Kathmandu, Nepal | January 2020 - February 2026

- Owned end-to-end IAM: Active Directory, RBAC, GPO enforcement, PAM, MFA rollout, and quarterly access reviews for 150+ users across 5 offices.
- Reduced security incidents by 60% via a structured vulnerability management program - assessments and penetration testing across 100+ assets, patch management, and system hardening.
- Implemented SIEM-based monitoring and alert triage, cutting MTTR by 40% with a repeatable incident response process.
- Managed multi-site network security infrastructure - firewalls, VPN, DNS, DHCP, proxy - at 99.9% uptime.
- Managed external IT vendors for procurement, implementation, and upgrade projects; enforced CIS-aligned security baselines.
- Designed automated backup, disaster recovery, and business continuity - zero data loss incidents over 3 years.
- Deputed as IT Consultant to Aistra Consultancy Co., Ltd. (Phnom Penh, Cambodia) for one year - infrastructure, security advisory, and IAM services.

Support Engineer / IT Consultant (AMC Contract)

Green IT Solutions Pvt. Ltd. - Kathmandu, Nepal | March 2016 - April 2019

- Delivered IT security support and ICT infrastructure services for 10+ enterprise clients at 98% SLA compliance, resolving 500+ incidents across hardware, software, and network and reducing recurrence by 35% via root cause analysis.
- Deputed to State Bank of India (Mar 2018 - Apr 2019): managed IAM for 200+ banking staff (AD user lifecycle, RBAC, privileged access), administered firewall/proxy infrastructure at 100% regulatory compliance, led incident response and RCA, and reduced system downtime by 30% through proactive monitoring and patch management.
- Deputed to Unilever Nepal (Jan 2017 - Dec 2017): administered Cisco network infrastructure, firewall policy, and Active Directory IAM for a 50+ user environment with zero critical security incidents; conducted security audits aligned to Unilever global IT standards.

IT Trainee

Platinum Hotel & SPA - Kathmandu, Nepal | March 2014 - May 2016

- IT support for hardware, software, and network troubleshooting across a 100+ room hospitality facility.
- Reduced average ticket response time by 25% through structured triage and proactive network monitoring.

KEY PROJECTS

- **SOC Detection Lab (2023 - Present):** Wazuh SIEM + Suricata IDS/IPS + Sysmon + mitmproxy + Pi-hole detection environment with 20+ MITRE ATT&CK-mapped rules, TLS inspection, DNS monitoring, and published IR SOPs aligned to NIST 800-61.
- **Full-Stack Observability Platform (2023 - Present):** Prometheus + Grafana monitoring across 10+ services with real-time security alerting and proactive incident detection.
- **Bug Bounty Research (2025 - Present):** Active researcher on HackerOne, Intigriti, and Bugcrowd; responsibly disclosed 15+ vulnerability patterns.
- **CI/CD Security Pipeline (2023, Deerwalk Training Center):** GitHub Actions-based pipeline with automated security checks and DevSecOps controls; cut deployment time by 60%.

CERTIFICATIONS AND TRAINING

- Endpoint Security - Cisco Networking Academy (2026)
- Ethical Hacker - Cisco Networking Academy (2026)
- Introduction to Cybersecurity - Cisco Networking Academy (2026)
- Cybersecurity Fundamentals - IBM SkillsBuild (2026)
- Python for Data Science - IBM (2026); Data Analysis with Python - IBM SkillsBuild (2026)
- Diploma in DevOps (CI/CD, AWS, Infrastructure Automation) - Deerwalk Training Center, Nepal (2023)
- CCNA - Cisco Certified Network Associate - Staff College, Jawalakhel, Nepal (2016)

EDUCATION

Bachelor of Business Studies (Management) - Mega National College, Tribhuvan University, Nepal | 2014 - 2022

Higher Secondary (+2), Computer Science - Nepal Kasthamandap Higher Secondary School (HSEB) | 2012 - 2014

LANGUAGES

Nepali - Native | English - Professional working proficiency | French - Elementary proficiency (A1 level)
